

AMENDMENTS TO THE DRAWINGS:

The attached sheets of drawings include changes to FIGs. 1-8B. The replacement drawings labeled FIGs. 1-8B, replace the original drawings labeled FIGs. 1-8B.

REMARKS

In response to the Office Action mailed February 21, 2007, Applicant submits the enclosed Amendments to the Specification and Claims as indicated above. The Examiner objected to claims 5 and 7-11, the Specification (as described at page 2 of the Office Action mailed February 21, 2007), and the drawings. Claims 1-14 were rejected under 35 U.S.C. §§101, 112, and 102. Claims 1-14 are canceled and new claims 15-30 are submitted. Claims 15-30 remain pending.

Regarding the objections to claims 5 and 7-11, the Specification (as described at page 2 of the Office Action mailed March 12, 2007) and the drawings, the informalities noted by the Examiner have been corrected. Amendments to the Specification, new drawings are submitted, which correct the noted informalities and do not add new subject matter.

To correct the order of the “SUMMARY OF THE INVENTION” section, the section title and its corresponding paragraph [0023] have been deleted from their initially-filed positions and added to new positions before the “BRIEF DESCRIPTION OF THE DRAWINGS” section. No new matter has been added.

Objections to the acronyms have been overcome with the amended paragraphs [0003], [0005], and [0006], which, as amended, describe the acronyms in full. Further, objections to the trademark terms have been overcome with the amended paragraphs [0038] and [0039] and misspelled terms have been corrected with amended paragraph [0054], as indicated by the Examiner. Applicant has also added the brief description for FIG. 8 in a new paragraph [0022.1], in which no new matter has been introduced. Reference numerals 94 and 96 in the initially-filed FIG. 3D have been used in the initially-filed FIG. 3C. Applicant has changed the reference numerals 94 and 96 in FIG. 3D to 93 and 95, respectively, to avoid duplicating reference

numerals, as indicated in amended paragraph [0062]. Applicant has removed the references to FIG. 3E in the amended paragraphs [0072] and [0073]. Applicant has changed reference numeral 172 to 177 in FIG. 8B and in the amended paragraph [0132]. Applicant has added, as suggested by the Examiner, reference numeral 109 to the “RFS’s & SR’s” item in FIG. 6 and to the corresponding descriptions of “RFS” in the amended paragraph [0077].

The Examiner’s objections to the original drawings have been corrected in the replacement drawings. FIG. 7B was objected to because the terminator labeled ‘end’ does not have a reference number. Pursuant to MPEP §608.02(5), “Reference characters not mentioned in the description shall not appear in the drawings.” No reference character or number has been mentioned in the description for the “end” of FIG. 7B, which is provided as a self-evident terminator to the process flow drawing shown. The Examiner requested the removal of “a box with 4 references inside the box on the top left hand corner.” The box has been removed as requested. New FIGs. 3A-3D have been redrawn with relationship pointers. New FIGs. 7A, 7B, 8A, and 8B have also been redrawn with relationship pointers. To provide clarity in the drawings, boxes 94 and 96 in the original FIG. 3D have been renumbered to 93 and 95, respectively, to avoid confusion with another pair of reference numerals 94 and 96, which are shown on FIG. 3C.

Further, original claims 1-14 are cancelled and new claims 15-30 are submitted. Applicant submits that new claims 15-30 are in condition for allowance.

If the Examiner has any questions regarding this Response, please do not hesitate to contact the undersigned.

Respectfully submitted,

A handwritten signature in black ink, appearing to be 'SK' followed by several stylized loops and a final vertical stroke.
